

## Seminar on Mitigation of Load Shedding through Power Exchange

Power Exchange India Limited (PXIL), along with FICCI and Deeaar Group organized a seminar on “Mitigation of Load Shedding through Power Exchange” at Taj Deccan, Hyderabad on 20th March, 2010.

In light of the new open access regime dawning in the State of Andhra Pradesh, PXIL has taken the initiative to bring various stakeholders in a crucible hoping to clear the mist and operationalize this opportunity for industries in the State.

With top officials from government, regulatory, exchange and trading side bringing a holistic perspective to the table, the seminar saw huge participation from players in the Metals, Cement and Sugar sectors of Andhra Pradesh. With the industrial consumers now getting open access freely to purchase electricity from the Power Markets, this event went a long way in addressing their queries on Load Shedding in the coming months and solutions available on Power exchange to mitigate the same.

The seminar was addressed initially by Shri Sutirtha Bhattacharyya, Principal Secretary – Energy and Mr. P Shri Rama Rao, Director, Grid Operations – AP Transco, followed by presentations from PXIL, GMR Power Trading and Deeaar Group. Topics like Power Trading, Products on PXIL, Exchange Operations and the technical and procedural requirements for trading at PXIL were covered.
